Underground dog fence Yes \_\_\_\_\_ No \_\_\_\_\_ Not Sure \_\_\_\_\_
Gutter drains Yes \_\_\_\_\_ No \_\_\_\_\_ Not Sure \_\_\_\_\_

Any other underground facilities that you are aware of.

LOCATION OF UNDERGROUND FACILITIES

- 1. Before installing your natural gas service line, we will contact the Indiana One Call System (INDIANA 811) to request locates from operators of underground facilities.
2. You are responsible for having any other underground facilities located before we start construction. Some examples to consider are septic tanks and fields, sewer lines, secondary electric lines, water lines, satellite dish lines, propane lines, underground dog fence, and gutter drains.

Note: many electric companies will mark their facilities to the meter only. This means a portion of your electric line from the meter to the home (commonly referred to as a secondary line) may not be located. It is your responsibility to have secondary lines located. Failure to do so relinquishes your rights to compensation if the line is damaged. Midwest Natural Gas will attempt to locate secondary lines for its own use and protection only.

MNG will not assume responsibility for any facilities that are improperly marked!
